My hottest item for winter this season is a loose fitting dress in lots of colours and prints. It looks stunning with leggings and hot ankle boots or over the knee boots, or with a leather jacket or vintage coat, and with red lips for a sexy night look.

If you tend to wear the same type of clothes every day, why not break out of your rut and embrace a new-season trend? If you're willing to play around with different styles you just might find one that works with your lifestyle and personality.

My hottest fashion item for winter is metallic sneakers. I've got a real thing for metallics at the moment and I think these gold / diamond Chuck Taylors are probably my favourite pair of kicks in the cupboard.

My must-have item is my gold, over-sized men's watch, and I can't live without my purple Prada clutch which sets off any outfit.

## sak it to me baby

In a world where making responsible shopping decisions is quickly becoming the norm and not the exception, Envirotrends Bamboo SAKiTOME provides the perfect accessory for the forward-thinking fashionista who appreciates a clever and stylish idea, rolled into one.

Using 100 percent natural bamboo fibre, the bags have a silky soft feel but are practical without sacrificing style – and they are streets ahead of your typical, green supermarket bag.
